

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

Benjamin H. Hill; re-elected in 1859 over Hon. Warren Aiken. He was a Secessionist in 1860, and was active and energetic as a war Governor after the State had seceded. In 1861 he was again elected Governor over the Hon. Eugenius A. Nisbet; in 1863 he was again a candidate for Governor, and opposed by Hon. Joshua Hill, an original Union man, and Hon. Timothy Furlow, an original Secessionist; Governor Brown was elected over both by a handsome majority. During the war, Governor Brown opposed the policy of President Davis on the conscript act, but threw no obstacles in the way of the execution of the law by the Confederate Government; he simply discussed with the President the constitutionality of the measure. After the surrender he advocated acquiescence in the reconstruction measures, and became very unpopular on account of his recommendation that the people acquiesce and carry them out in good faith. As the Democratic party opposed these measures, as a reconstructionist he voted for General Grant, who favored them. During the Legislature of 1868 he was nominated by the Republicans for United States Senator, and defeated by Hon. After his defeat for Senator he was appointed by Governor Bullock Chief Justice of the Supreme Court of Georgia, which position he held till December, 1870, when he resigned and accepted the presidency of the Western Atlantic Railroad Company. He then devoted his life to business pursuits, being a candidate for no office, but acting with the Democratic party since 1872 upon the reconstruction platform. When General Gordon resigned his position in the Senate Governor Brown was appointed to fill the vacancy; he was afterwards elected over General A. R. Lawton, his opponent, by over a two-thirds majority of the Legislature. His term of service will expire March 3, 1885.

THE CAPITOL.

The Capitol fronts the east, and stands on a plateau ninety feet above the level of the Potomac, in latitude $38^{\circ} 53' 20''.4$ north and longitude $77^{\circ} 00' 35''.7$ west from Greenwich.

The southeast corner-stone of the original building was laid on the 18th of September, 1793, by President Washington, aided by the Freemasons of Maryland. It was constructed of sandstone, painted white, from an island in Aquia Creek, Virginia, under the direction of Stephen H. Hallett, James Hoban, Geo. Hadfield, and afterwards of B. H. Latrobe, architects. The north wing was finished in 1800 and the south wing in 1811, a wooden passage-way connecting them. On the 24th of August, 1814, the interior of both wings was destroyed by British incendiaries, but they were immediately rebuilt. In 1818, the central portion of the building was commenced under the architectural superintendence of Charles Bulfinch, and the original building was finally completed in 1827. Its cost, including the grading of the grounds, alterations, and repairs, up to 1827, was \$2,433,844.13.

The corner-stone to the extensions of the Capitol was laid on the 4th of July, 1851, by President Fillmore, Daniel Webster officiating as orator of the day. Thomas U. Walter was architect, and subsequently Edward Clark, under whose direction the work was completed in November, 1867. The material used for the extensions is white marble from the quarries at Lee, Massachusetts, with white marble columns from the quarries at Cockeysville, Maryland.

The dome of the original central building was constructed of wood, but was removed in 1856 to be replaced by the present stupendous structure of cast iron, which was completed in 1865. The entire weight of iron used is 8,909,200 pounds.

The main building is three hundred and fifty-two feet four inches long in front and one hundred and twenty-one feet six inches deep, with a portico one hundred and sixty feet wide, of twenty-four columns on the east, and a projection of eighty-three feet on the west, embracing a recessed portico of ten coupled columns. The extensions are placed at the north and south ends of the main building, with connecting corridors forty-four feet long by fifty-six feet wide, flanked by columns. Each extension is one hundred and forty-two feet eight inches in front, by two hundred and thirty-eight feet ten inches deep, with porticos of twenty-two columns each on their eastern fronts, and with porticos of ten columns on their ends and on their western fronts. The entire length of the building is seven hundred and fifty-one feet four inches, and the greatest depth, including porticos and steps, is three hundred and twenty-four feet. The area covered by the entire building is one hundred and fifty-three thousand one hundred and twelve square feet.

The dome is crowned by a bronze statue of Freedom, modeled by Crawford, which is nineteen feet six inches high, and which weighs 14,985 pounds. The height of the dome above the base-line of the east front is two hundred and eighty-seven feet eleven inches; the height from the top of the balustrade of the building is two hundred and seventeen feet eleven inches; and the greatest diameter at the base is one hundred and thirty-five feet five inches.

The rotunda is ninety-five feet six inches in diameter, and its height from the floor to the top of the canopy is one hundred and eighty feet three inches.

The Senate Chamber is one hundred and twelve feet in length, by eighty-two feet in width, and thirty feet in height. Its galleries will accommodate one thousand persons.

The Representatives' Hall is one hundred and thirty feet in length, by ninety-three feet in width, and thirty feet in height.

The Supreme Court room was occupied by the Senate until December, 1859, the court having previously occupied the room beneath, now used as a law library.

The Library of Congress was burned by the British in 1814, and was partially destroyed by an accidental fire in 1851. The present centre hall was finished in 1853, and the wing halls were finished in 1867.

The Library of Congress occupies the entire western projection of the central Capitol building. The original library was commenced in 1800, but was destroyed with the Capitol in 1814 during the war with England. It was afterwards replenished by the purchase of the library belonging to Ex-President Jefferson, by Congress, embracing about 7,000 volumes. In 1851 it contained 55,000 volumes, and by an accidental fire in that year the whole collection was destroyed, except 20,000 volumes. It was rebuilt in 1852, when \$75,000 was appropriated in one sum to replenish the collection. The new library halls, three in number, are fitted up with ornamental iron cases and iron ceilings, the whole being perfectly fire-proof. The library is recruited by regular appropriations made by Congress, which average about \$11,000 per annum; also by additions received by copyright, by exchanges, and from the Smithsonian Institution. The library of the Smithsonian Institution has now been deposited in the Library of Congress, where it is secured against loss by fire. This collection is especially rich in scientific works, embracing the largest assemblage of the transactions of learned societies which exists in the country. The library was also enriched by the presentation to the Government, in 1882, of the large private library of Dr. Joseph M. Toner, of Washington, numbering over 27,000 volumes, besides nearly as many pamphlets. The donor, whose public spirit is worthy of emulation, adds to the collection annually. The library of copyright books was removed here from the Patent Office in 1870, and all copyrights issued in the United States are now recorded in the books deposited in the office of the Librarian of Congress. The present number of volumes in the whole library, including law books, which are kept in a separate library room under the Supreme Court, is over 513,000, besides about 170,000 pamphlets. A new building to contain its overflowing stores of learning and to afford room for their proper arrangement has become a necessity. This collection is very rich in history, political science, jurisprudence, and in books, pamphlets, and periodicals of American publication, or relating in any way to America. At the same time the library is a universal one in its range, no department of literature or science being unrepresented. The public are privileged to use the books in the library, while members of Congress and about thirty official members of the Government only can take away books. The library is open every day (Sundays excepted) during the session of Congress from 9 a. m. to the hour of adjournment. In the recess of Congress it is open between the hours of 9 a. m. and 4 p. m.

It prepares the advertisements for mail proposals, receives the bids, and has charge of the annual and occasional mail lettings, and the adjustment and execution of the contracts. All applications for the establishment or alteration of mail arrangements and for mail messengers should be sent to this office. This division receives all accounts, monthly or quarterly, of the depository and draft offices, and certificates of deposit from depositing offices.

THE DEPARTMENT OF JUSTICE.

THE ATTORNEY-GENERAL.

The Attorney-General is the head of the Department of Justice, and the chief law officer of the Government. He represents the United States in matters involving legal questions; he gives his advice and opinion on questions of law when they are required by the President, or by the heads of the other Executive Departments on questions of law arising upon the administration of their respective Departments; he exercises a general superintendence and direction over United States Attorneys and Marshals in all judicial districts in the States and Territories; and he provides special counsel for the United States whenever required by any Department of the Government.

He is assisted by a Chief Clerk and other clerks and employes in the executive management of the business of the Department.

The Law Clerk, who is also an Examiner of Titles, assists the Attorney-General in the investigation of legal questions and in the preparation of opinions.

THE SOLICITOR-GENERAL.

The Solicitor-General assists the Attorney-General in the performance of his general duties, and by special provision of law in the case of a vacancy in the office of Attorney-General, or in his absence, exercises all these duties. Except when the Attorney-General in particular cases otherwise directs, the Attorney-General and Solicitor-General conduct and argue all cases in the *Supreme Court*, and in the *Court of Claims*, in which the United States are interested; and, when the Attorney-General so directs, any such case in *any court of the United States* may be conducted and argued by the Solicitor-General; and in the same way the Solicitor-General may be sent by the Attorney-General to attend to the interests of the United States in *any State court, or elsewhere*.

THE ASSISTANT ATTORNEYS-GENERAL.

Two Assistant Attorneys-General assist the Attorney-General and the Solicitor-General in the performance of their duties. One assists in the argument of causes in the Supreme Court and in the preparation of legal opinions; the other is charged with the conduct of the defence of the United States in the Court of Claims.

Under the act of 1870 the different law officers of the Executive Departments exercise their functions under the supervision and control of the Attorney-General. They are: the *Assistant Attorney-General for the Department of the Interior*; the *Assistant Attorney-General for the Post-Office Department*; the *Solicitor of the Treasury*; and the *Solicitor of Internal Revenue*, Treasury Department; the *Naval Solicitor*, Navy Department; and the *Examiner of Claims*, State Department.

THE DEPARTMENT OF AGRICULTURE.

THE COMMISSIONER OF AGRICULTURE.

The Commissioner of Agriculture is required to collect and diffuse useful information on subjects connected with agriculture. He is to acquire and preserve in his office all information he can obtain concerning agriculture by means of books and correspondence, and by practical and scientific experiments, the collection of statistics, and other appropriate means; to collect new and valuable seeds and plants; to learn by actual cultivation such of them as may require such tests; to propagate such as may be worthy of propagation, and to distribute them among agriculturists.

The Statistician.—He collects reliable information as to the condition, prospects, and results of the cereal, cotton, and other crops, by the instrumentality of four correspondents in each county of every State; this information is gathered at stated periods of each month, carefully studied, estimated, tabulated, and published.

The Entomologist.—He obtains information with regard to insects injurious to vegetation; investigates the character of insects sent him, to point out their modes of infliction and the means by which their depredations may be avoided; and arranges specimens of their injuries and nest architecture.

The Botanist.—He receives botanical contributions, and after making desirable selections for the National Herbarium, distributes the duplicate plants among foreign and domestic scientific societies, institutions of learning, and botanists; and answers inquiries of botanico-agricultural character.

The Chemist.—He makes analyses of natural fertilizers, vegetable products, and other materials which pertain to the interests of agriculture. Applications are constantly made from all portions of the country for the analysis of soils, minerals, liquids, and manures.

The Microscopist.—He makes original investigations, mostly relating to the habits of parasitic fungoid plants, which are frequently found on living plants and animals, producing sickly growth and in many cases premature death.

The Propagating Garden.—Large numbers of exotic, utilizable, and economic plants are propagated and distributed. The orange family is particularly valuable, and the best commercial varieties are propagated and distributed to the greatest practicable extent.

The Seed Division.—Seeds are purchased in this and foreign countries of reliable firms, whose guarantee of good quality and genuineness cannot be questioned; they are packed at the Department, and distributed to applicants in all parts of the country.

The Library.—Exchanges are made, by which the library receives reports of the leading agricultural, pomological, and meteorological societies of the world.

Samples of merchandise are mailable, but they must not exceed eight ounces in weight, and are subject to a postage of ten cents each. They must also be strictly specimens of goods for sale.

Packets of patterns or samples of merchandise for dispatch in the mails to foreign countries are restricted to *bona fide* trade samples or specimens having no salable or commercial value in excess of that actually necessary for their use as samples or specimens. Goods sent for sale, in execution of an order, or as gifts, however small the quantity may be, are not admissible at sample rates and conditions.

Articles not specifically enumerated in postal conventions or in the United States postal laws and regulations as transmissible in the mails to foreign countries, or which are not homogeneous with those therein enumerated, are not entitled to be sent at the reduced rates of postage fixed for correspondence other than letters, but may be transmitted at letter rates of postage, *fully prepaid*, provided they are not absolutely excluded from the mails by the provisions of postal conventions, or by the laws and regulations. (See Circular, pp. 29 and 30, Guide for September, 1881.) By special agreement merchandise, not *bona fide* trade samples, is excluded from the mails under the existing postal arrangement between the United States and Canada. Prepayment thereof at letter rates will not, therefore, secure its transmission by post between the two countries.

UNMAILABLE MATTER.

Liquids, poisons, explosive and inflammable articles, fatty substances, oils, ointments, ink, coloring matter, powdered red pepper, living or dead animals (not stuffed), insects (excepting queen bees when safely secured), fruits or vegetable matter liable to decomposition, razors, and substances exhaling a bad odor.

EXCEPTIONS.—*Hard soap* and *pocket knives* may now be sent through the mails if wrapped securely in heavy paper.

Candy, confectionery, glass, and other articles liable to injure the contents of the mail-bags, may be sent through the mails when they conform to the following conditions:

1. They must be placed in a bag, box, or removable envelope made of paper, cloth, or parchment.
2. Such bag, box, or envelope, must again be placed in a box or tube made of metal or some hard wood, with sliding, clasp, or screw lid.

In case of *sharp-pointed instruments*, the point must be capped or encased, so that they may not by any means be liable to cut through their inclosure, and where they have blades, such blades must be bound with wire, so that they shall remain firmly attached to each other.

Joseph E. Brown, of Atlanta, Georgia, was born in Pickens District, South Carolina, April 15, 1821; when he was a boy, his father moved to Georgia; he was educated at Calhoun Academy, South Carolina; he taught school in Canton, Georgia; he was admitted to the bar in August, 1845; he afterwards graduated in Yale College Law School, and returned to Georgia and commenced the practice of law in 1846; in 1849 he was elected to the State Senate; in 1852 he was a Pierce Elector; in 1855 he was elected Judge of the Superior Courts of the Blue Ridge Circuit; in 1857 he was elected Governor by the Democratic party over Hon. Benjamin H. Hill; re-elected in 1859 over Hon. Warren Aiken. He was a Secessionist in 1860, and was active and energetic as a war Governor after the State had seceded. In 1861 he was again elected Governor over the Hon. Eugenius A. Nisbet; in 1863 he was again a candidate for Governor, and opposed by Hon. Joshua Hill, an original Union man, and Hon. Timothy Furlow, an original Secessionist; Governor Brown was elected over both by a handsome majority. During the war, Governor Brown opposed the policy of President Davis on the conscript act, but threw no obstacles in the way of the execution of the law by the Confederate Government; he simply discussed with the President the constitutionality of the measure. After the surrender he advocated acquiescence in the reconstruction measures, and became very unpopular on account of his recommendation that the people acquiesce and carry them out in good faith. As the Democratic party opposed these measures, as a reconstructionist he voted for General Grant, who favored them. During the Legislature of 1868 he was nominated by the Republicans for United States Senator, and defeated by Hon. Joshua Hill, which was the only defeat of his life; in every instance when he has been a candidate before the people he has been successful. After his defeat for Senator he was appointed by Governor Bullock Chief Justice of the Supreme Court of Georgia, which position he held till December, 1870, when he resigned and accepted the presidency of the Western Atlantic Railroad Company. He then devoted his life to business pursuits, being a candidate for no office, but acting with the Democratic party since 1872 upon the reconstruction platform. When General Gordon resigned his position in the Senate Governor Brown was appointed to fill the vacancy; he was afterwards elected over General A. R. Lawton, his opponent, by over a two-thirds majority of the Legislature. His term of service will expire March 3, 1885.

THE CAPITOL.

The Capitol fronts the east, and stands on a plateau eighty-eight feet above the level of the Potomac, in latitude $38^{\circ} 53' 20'' .4$ north and longitude $77^{\circ} 00' 35'' .7$ west from Greenwich.

The southeast corner-stone of the original building was laid on the 18th of September, 1793, by President Washington, aided by the Freemasons of Maryland. It was constructed of sandstone, painted white, from an island in Aquia Creek, Virginia, under the direction of Stephen H. Hallett, James Hoban, Geo. Hadfield, and afterwards of B. H. Latrobe, architects. The north wing was finished in 1800 and the south wing in 1811, a wooden passage-way connecting them. On the 24th of August, 1814, the interior of both wings was destroyed by British incendiaries, but they were immediately rebuilt. In 1818, the central portion of the building was commenced under the architectural superintendence of Charles Bulfinch, and the original building was finally completed in 1827. Its cost, including the grading of the grounds, alterations, and repairs, up to 1827, was \$2,433,844.13.

The corner-stone to the extensions of the Capitol was laid on the 4th of July, 1851, by President Fillmore, Daniel Webster officiating as orator of the day. Thomas U. Walter was architect, and subsequently Edward Clark, under whose direction the work was completed in November, 1867. The material used for the extensions is white marble from the quarries at Lee, Massachusetts, with white marble columns from the quarries at Cockeysville, Maryland.

The dome of the original central building was constructed of wood, but was removed in 1856 to be replaced by the present stupendous structure of cast iron, which was completed in 1865. The entire weight of iron used is 8,909,200 pounds.

The main building is three hundred and fifty-two feet four inches long in front and one hundred and twenty-one feet six inches deep, with a portico one hundred and sixty feet wide, of twenty-four columns on the east, and a projection of eighty-three feet on the west, embracing a recessed portico of ten coupled columns. The extensions are placed at the north and south ends of the main building, with connecting corridors forty-four feet long by fifty-six feet wide, flanked by columns. Each extension is one hundred and forty-two feet eight inches in front, by two hundred and thirty-eight feet ten inches deep, with porticos of twenty-two columns each on their eastern fronts, and with porticos of ten columns on their ends and on their western fronts. The entire length of the building is seven hundred and fifty-one feet four inches, and the greatest depth, including porticos and steps, is three hundred and twenty-four feet. The area covered by the entire building is one hundred and fifty-three thousand one hundred and twelve square feet.

The dome is crowned by a bronze statue of Freedom, modeled by Crawford, which is nineteen feet six inches high, and which weighs 14,985 pounds. The height of the dome above the base-line of the east front is two hundred and eighty-seven feet five inches; the height from the top of the balustrade of the building is two hundred and seventeen feet eleven inches; and the greatest diameter at the base is one hundred and thirty-five feet five inches.

The rotunda is ninety-five feet six inches in diameter, and its height from the floor to the top of the canopy is one hundred and eighty feet three inches.

The Senate Chamber is one hundred and thirteen feet three inches in length, by eighty feet three inches in width, and thirty-six feet in height. Its galleries will accommodate one thousand persons.

The Representatives' Hall is one hundred and thirty-nine feet in length, by ninety-three feet in width, and thirty-six feet in height.

The Supreme Court room was occupied by the Senate until December, 1859, the court having previously occupied the room beneath, now used as a law library.

The Library of Congress was burned by the British in 1814, and was partially destroyed by an accidental fire in 1851. The present centre hall was finished in 1853, and the wing halls were finished in 1867.

The Library of Congress occupies the entire western projection of the central Capitol building. The original library was commenced in 1800, but was destroyed with the Capitol in 1814 during the war with England. It was afterwards replenished by the purchase of the library belonging to Ex-President Jefferson, by Congress, embracing about 7,000 volumes. In 1851 it contained 55,000 volumes, and by an accidental fire in that year the whole collection was destroyed, except 20,000 volumes. It was rebuilt in 1852, when \$75,000 was appropriated in one sum to replenish the collection. The new library halls, three in number, are fitted up with ornamental iron cases and iron ceilings, the whole being perfectly fire-proof. The library is recruited by regular appropriations made by Congress, which average about \$11,000 per annum; also by additions received by copyright, by exchanges, and from the Smithsonian Institution. The library of the Smithsonian Institution has now been deposited in the Library of Congress, where it is secured against loss by fire. This collection is especially rich in scientific works, embracing the largest assemblage of the transactions of learned societies which exists in the country. The library was also enriched by the presentation to the Government, in 1882, of the large private library of Dr. Joseph M. Toner, of Washington, numbering over 27,000 volumes, besides nearly as many pamphlets. The donor, whose public spirit is worthy of emulation, adds to the collection annually. The library of copyright books was removed here from the Patent Office in 1870, and all copyrights issued in the United States are now recorded in the books deposited in the office of the Librarian of Congress. The present number of volumes in the whole library, including law books, which are kept in a separate library room under the Supreme Court, is over 513,000, besides about 170,000 pamphlets. A new building to contain its overflowing stores of learning and to afford room for their proper arrangement has become a necessity. This collection is very rich in history, political science, jurisprudence, and in books, pamphlets, and periodicals of American publication, or relating in any way to America. At the same time the library is a universal one in its range, no department of literature or science being unrepresented. The public are privileged to use the books in the library, while members of Congress and about thirty official members of the Government only can take away books. The library is open every day (Sundays excepted) during the session of Congress from 9 a. m. to the hour of adjournment. In the recess of Congress it is open between the hours of 9 a. m. and 4 p. m.

Except when the Attorney-General in particular cases otherwise directs, the Attorney-General and Solicitor-General conduct and argue all cases in the *Supreme Court*, and in the *Court of Claims*, in which the United States are interested; and, when the Attorney-General so directs, any such case in *any court of the United States* may be conducted and argued by the Solicitor-General; and in the same way the Solicitor-General may be sent by the Attorney-General to attend to the interests of the United States in *any State court, or elsewhere*.

He is to acquire and preserve in his office all information he can obtain concerning agriculture by means of books and correspondence, and by practical and scientific experiments, the collection of statistics, and other appropriate means; to collect new and valuable seeds and plants; to learn by actual cultivation such of them as may require such tests; to propagate such as may be worthy of propagation, and to distribute them among agriculturists.

The Statistician.—He collects reliable information as to the condition, prospects, and results of the cereal, cotton, and other crops, by the instrumentality of four correspondents in each county of every State; this information is gathered at stated periods of each month, carefully studied, estimated, tabulated, and published.

The Entomologist.—He obtains information with regard to insects injurious to vegetation; investigates the character of insects sent him, to point out their modes of infliction and the means by which their depredations may be avoided; and arranges specimens of their injuries and nest architecture.

The Botanist.—He receives botanical contributions, and after making desirable selections for the National Herbarium, distributes the duplicate plants among foreign and domestic scientific societies, institutions of learning, and botanists; and answers inquiries of botanico-agricultural character.

The Chemist.—He makes analyses of natural fertilizers, vegetable products, and other materials which pertain to the interests of agriculture. Applications are constantly made from all portions of the country for the analysis of soils, minerals, liquids, and manures.

The Microscopist.—He makes original investigations, mostly relating to the habits of parasitic fungoid plants, which are frequently found on living plants and animals, producing sickly growth and in many cases premature death.

The Propagating Garden.—Large numbers of exotic, utilizable, and economic plants are propagated and distributed. The orange family is particularly valuable, and the best commercial varieties are propagated and distributed to the greatest practicable extent.

The Seed Division.—Seeds are purchased in this and foreign countries of reliable firms, whose guarantee of good quality and genuineness cannot be questioned; they are packed at the Department, and distributed to applicants in all parts of the country.

Second-class mail matter can have no advertising sheets, notices, memoranda, or circulars inclosed therein.

THIRD-CLASS MATTER.

Mail-matter of the third class embraces books (printed), circulars (see ruling 269), proof-sheets and corrected proof-sheets with manuscript copy accompanying the same, and all matter of the same general character, as above enumerated, the printing upon which is designed to instruct, amuse, cultivate the mind or taste, or impart general information, and postage shall be paid thereon at the rate of one cent for each two ounces or fractional part thereof, and on newspapers and periodical publications of the second class, when sent by others than the publisher or news agent, the postage shall be prepaid at the rate of one cent for each four ounces or fractional part thereof.

The ruling of the Postmaster-General, as shown in the Post-Office Department Daily Bulletin of January 2, 1884, supersedes, and wholly annuls that portion of ruling 1216, December, 1883, Guide, which rates certain matter as merchandise, when sent as such, by a manufacturer to a purchaser. Cards, labels, and like matter are to be rated as fourth class, as declared in said ruling. After matter is declared to be of a certain class, it cannot be subject to two rates of postage; or, in other words, the postage rates are the same; whether sent in small or in large quantities. (See rulings 458 and 471.)

FOURTH-CLASS MATTER.

Mailable matter of the fourth class embraces labels, patterns, photographs, playing cards, visiting cards, address tags, paper sacks, wrapping paper, and blotting pads with or without printed advertisements thereon, bill-heads, letter-heads, envelopes with printed addresses thereon, ornamented paper, and all other matter of the same general character, the printing upon which is not designed to instruct, amuse, cultivate the mind or taste, or impart general information. This class also includes merchandise, and samples of merchandise, models, samples of ores, metals, minerals, seeds, etc., and any other matter not included in the first, second, or third classes, and which is not in its form or nature liable to destroy, deface, or otherwise damage the contents of the mail bag, or harm the person. Postage rate thereon, one cent for each ounce or fractional part thereof.

PERMISSIBLE WRITING.

No writing is permitted on third or fourth-class matter except as follows: name and address of sender on the outside or inside of package, preceded by the word "from." On the wrapper may also be written the names and number of articles inclosed. The sender is further allowed to mark a word or passage in a book or paper to which he desires to call special attention. He may also write a simple inscription or dedication upon the cover or blank leaves of a book or pamphlet. There may be attached to articles of merchandise, by tag or label, a mark, number, name, or letter for purpose of identification. Printed circulars may contain the written name of the sender, or of the addressee, and the date. Any other writing on third or fourth-class matter will subject the package to letter rates of postage, and render the sender liable to a fine of ten dollars for each offense. Printed matter may be inclosed with fourth-class matter, but the whole package is subject to the rate of one cent per ounce or fraction thereof.

REGISTRY DIVISION.

Open from 8.30 a. m. to 5 p. m., except Sunday.

First, third, and fourth-class matter may be registered at an expense of ten cents for each package, in addition to the regular postage, which must be fully prepaid.

Matter can be registered to any post-office in the United States and to foreign countries and colonies in the Universal Postal Union, but to certain countries and colonies not in the Universal Postal Union registration of letters only is permissible, while to some parts of the world there is no means of forwarding registered matter.

FOREIGN RATES.

To all following countries and places, which are in the Universal Postal Union, the postage on LETTERS is FIVE (5) CENTS for each HALF OUNCE or fraction thereof, TWO CENTS for each postal card, and ONE CENT for each TWO OUNCES NEWSPAPERS: Argentine Republic, Austria and Hungary, Bahamas, Barbadoes, Belgium, Bermudas, Brazil, Bulgaria, Ceylon, China via Hong-Kong, Chili, Cuba, Denmark and Danish colonies, Ecuador, Egypt, Falkland Islands, France and French colonies, Germany, Great Britain, Greece, Greenland, Guatemala, Hayti, Holland or Netherlands and Netherland Colonies, Honduras, Hong-Kong, India (British), Ireland, Italy, Jamaica, Japan, Liberia, Luxembourg, Malacca, Mauritius, Mexico, Montenegro, Newfoundland, Norway, Paraguay, Penang, Persia, Portugal and Portuguese Colonies, Roumania, Russia, Salvador, Servia, Singapore, Spain and Spanish Colonies, Straits Settlements, St. Vincent (W. I.), Sweden, Switzerland, Trinidad, Turkey, United States of Colombia, Uruguay, Venezuela.

POSTAGE TO COUNTRIES AND PLACES NOT IN POSTAL UNION, PREPAYMENT COMPULSORY.—To the following foreign places the postage on letters and newspapers is as follows:

Letters not exceeding $\frac{1}{2}$ ounce to Cape of Good Hope, 15 cents; newspapers, 3 cents. Letters not exceeding $\frac{1}{2}$ ounce to China via *Brindisi*, 13 cents; newspapers, 4 cents. Letters not exceeding $\frac{1}{2}$ ounce to Australia, except New South Wales, Queensland, and Victoria via San Francisco, 5 cents; newspapers, 2 cents. Letters not exceeding $\frac{1}{2}$ ounce to New South Wales, Queensland, Victoria, and New Zealand via San Francisco, 12 cents; newspapers, 2 cents.

RATES OF POSTAGE TO CANADA.

(The Dominion of Canada embraces all the British North American Provinces except Newfoundland.)

Letters and Postal Cards.—Same rates and conditions of prepayment of postage as for domestic letters and postal cards.

Other Matter.—Same rates and conditions of transmission as for matter for delivery within the United States, except that merchandise is rigidly excluded. Samples of merchandise are mailable, but they must not exceed eight ounces in weight, and are subject to a postage of ten cents each. They must also be strictly specimens of goods for sale.

Packets of patterns or samples of merchandise for dispatch in the mails to foreign countries are restricted to *bona fide* trade samples or specimens having no salable or commercial value in excess of that actually necessary for their use as samples or specimens. Goods sent for sale, in execution of an order, or as gifts, however small the quantity may be, are not admissible at sample rates and conditions.

Articles not specifically enumerated in postal conventions or in the United States postal laws and regulations as transmissible in the mails to foreign countries, or which are not homogeneous with those therein enumerated, are not entitled to be sent at the reduced rates of postage fixed for correspondence other than letters, but may be transmitted at letter rates of postage, *fully prepaid*, provided they are not absolutely excluded from the mails by the provisions of postal conventions, or by the laws and regulations. (See Circular, pp. 29 and 30, Guide for September, 1881.) By special agreement merchandise, not *bona fide* trade samples, is excluded from the mails under the existing postal arrangement between the United States and Canada. Prepayment thereof at letter rates will not, therefore, secure its transmission by post between the two countries.

UNMAILABLE MATTER.

Liquids, poisons, explosive and inflammable articles, fatty substances, oils, ointments, ink, coloring matter, powdered red pepper, living or dead animals (not stuffed), insects (excepting queen bees when safely secured), fruits or vegetable matter liable to decomposition, razors, and substances exhaling a bad odor.

EXCEPTIONS.—*Hard soap* and *pocket knives* may now be sent through the mails if wrapped securely in heavy paper.

Candy, confectionery, glass, and other articles liable to injure the contents of the mail-bags, may be sent through the mails when they conform to the following conditions:

1. They must be placed in a bag, box, or removable envelope made of paper, cloth, or parchment.

2. Such bag, box, or envelope, must again be placed in a box or tube made of metal or some hard wood, with sliding, clasp, or screw lid.

In case of *sharp-pointed instruments*, the point must be capped or encased, so that they may not by any means be liable to cut through their inclosure, and where they have blades, such blades must be bound with wire, so that they shall remain firmly attached to each other.

Brown, of Atlanta, Georgia, was born in Pickens District, South Carolina, April 15, 1821; when he was a boy, his father moved to Georgia; he was educated at Calhoun Academy, South Carolina; he taught school in Canton, Georgia; he was admitted to the bar in August, 1845; he afterwards graduated in Yale College Law School, and returned to Georgia and commenced the practice of law in 1846; in 1849 he was elected to the State Senate; in 1852 he was a Pierce Elector; in 1855 he was elected Judge of the Superior Courts of the Blue Ridge Circuit; in 1857 he was elected Governor by the Democratic party over Hon. Benjamin H. Hill; re-elected in 1859 over Hon. Warren Aiken. He was a Secessionist in 1860, and was active and energetic as a war Governor after the State had seceded. In 1861 he was again elected Governor over the Hon. Eugenius A. Nisbet; in 1863 he was again a candidate for Governor, and opposed by Hon. Joshua Hill, an original Union man, and Hon. Timothy Furlow, an original Secessionist; Governor Brown was elected over both by a handsome majority. During the war, Governor Brown opposed the policy of President Davis on the conscript act, but threw no obstacles in the way of the execution of the law by the Confederate Government; he simply discussed with the President the constitutionality of the measure. After the surrender he advocated acquiescence in the reconstruction measures, and became very unpopular on account of his recommendation that the people acquiesce and carry them out in good faith. As the Democratic party opposed these measures, as a reconstructionist he voted for General Grant, who favored them. During the Legislature of 1868 he was nominated by the Republicans for United States Senator, and defeated by Hon. Joshua Hill, which was the only defeat of his life; in every instance when he has been a candidate before the people he has been successful. After his defeat for Senator he was appointed by Governor Bullock Chief Justice of the Supreme Court of Georgia, which position he held till December, 1870, when he resigned and accepted the presidency of the Western Atlantic Railroad Company. He then devoted his life to business pursuits, being a candidate for no office, but acting with the Democratic party since 1872 upon the reconstruction platform. When General Gordon resigned his position in the Senate Governor Brown was appointed to fill the vacancy; he was afterwards elected over General A. R. Lawton, his opponent, by over a two-thirds majority of the Legislature. His term of service will expire March 3, 1885.

Doctor York was an active Democratic leader in his section of the State until the question of prohibition was brought before the Legislature of 1880-'81, at the time being Chairman of the joint caucus of the Democratic party; he strongly urged his Democratic friends not to suffer the bill to pass the Legislature, and was the only member of the Senate that made a speech against the measure, and when the bill had passed, he returned home and took the stump against the ratification of the bill, and did more to defeat the measure than any other one man in the State; the campaign brought about much bitterness, the result of which was that Dr. York was nominated by the liberal Democrats of his district and indorsed by the Republicans for a seat in the Forty-eighth Congress. The Library of Congress occupies the entire western projection of the central Capitol building. The original library was commenced in 1800, but was destroyed with the Capitol in 1814 during the war with England. It was afterwards replenished by the purchase of the library belonging to Ex-President Jefferson, by Congress, embracing about 7,000 volumes. In 1851 it contained 55,000 volumes, and by an accidental fire in that year the whole collection was destroyed, except 20,000 volumes. It was rebuilt in 1852, when \$75,000 was appropriated in one sum to replenish the collection. The new library halls, three in number, are fitted up with ornamental iron cases and iron ceilings, the whole being perfectly fire-proof. The library is recruited by regular appropriations made by Congress, which average about \$11,000 per annum; also by additions received by copyright, by exchanges, and from the Smithsonian Institution. The library of the Smithsonian Institution has now been deposited in the Library of Congress, where it is secured against loss by fire. This collection is especially rich in scientific works, embracing the largest assemblage of the transactions of learned societies which exists in the country. The library was also enriched by the presentation to the Government, in 1882, of the large private library of Dr. Joseph M. Toner, of Washington, numbering over 27,000 volumes, besides nearly as many pamphlets. The donor, whose public spirit is worthy of emulation, adds to the collection annually. The library of copyright books was removed here from the Patent Office in 1870, and all copyrights issued in the United States are now recorded in the books deposited in the office of the Librarian of Congress. The present number of volumes in the whole library, including law books, which are kept in a separate library room under the Supreme Court, is over 525,000, besides about 170,000 pamphlets. A new building to contain its overflowing stores of learning and to afford room for their proper arrangement has become a necessity. This collection is very rich in history, political science, jurisprudence, and in books, pamphlets, and periodicals of American publication, or relating in any way to America. At the same time the library is a universal one in its range, no department of literature or science being unrepresented. The public are privileged to use the books in the library, while members of Congress and about thirty official members of the Government only can take away books. The library is open every day (Sundays excepted) during the session of Congress from 9 a. m. to the hour of adjournment. In the recess of Congress it is open between the hours of 9 a. m. and 4 p. m.

THE CAPITOL.

The Capitol fronts the east, and stands on a plateau eighty-eight feet above the level of the Potomac, in latitude $38^{\circ} 53' 20''.4$ north and longitude $77^{\circ} 00' 35''.7$ west from Greenwich.

The southeast corner-stone of the original building was laid on the 18th of September, 1793, by President Washington, aided by the Freemasons of Maryland. It was constructed of sandstone, painted white, from an island in Aquia Creek, Virginia, under the direction of Stephen H. Hallett, James Hoban, Geo. Hadfield, and afterwards of B. H. Latrobe, architects. The north wing was finished in 1800 and the south wing in 1811, a wooden passage-way connecting them. On the 24th of August, 1814, the interior of both wings was destroyed by British incendiaries, but they were immediately rebuilt. In 1818, the central portion of the building was commenced under the architectural superintendence of Charles Bulfinch, and the original building was finally completed in 1827. Its cost, including the grading of the grounds, alterations, and repairs, up to 1827, was \$2,433,844.13.

The corner-stone to the extensions of the Capitol was laid on the 4th of July, 1851, by President Fillmore, Daniel Webster officiating as orator of the day. Thomas U. Walter was architect, and subsequently Edward Clark, under whose direction the work was completed in November, 1867. The material used for the extensions is white marble from the quarries at Lee, Massachusetts, with white marble columns from the quarries at Cockeysville, Maryland.

The dome of the original central building was constructed of wood, but was removed in 1856 to be replaced by the present stupendous structure of cast iron, which was completed in 1865. The entire weight of iron used is 8,909,200 pounds.

The main building is three hundred and fifty-two feet four inches long in front and one hundred and twenty-one feet six inches deep, with a portico one hundred and sixty feet wide, of twenty-four columns on the east, and a projection of eighty-three feet on the west, embracing a recessed portico of ten coupled columns. The extensions are placed at the north and south ends of the main building, with connecting corridors forty-four feet long by fifty-six feet wide, flanked by columns. Each extension is one hundred and forty-two feet eight inches in front, by two hundred and thirty-eight feet ten inches deep, with porticos of twenty-two columns each on their eastern fronts, and with porticos of ten columns on their ends and on their western fronts. The entire length of the building is seven hundred and fifty-one feet four inches, and the greatest depth, including porticos and steps, is three hundred and twenty-four feet. The area covered by the entire building is one hundred and fifty-three thousand one hundred and twelve square feet.

The dome is crowned by a bronze statue of Freedom, modeled by Crawford, which is nineteen feet six inches high, and which weighs 14,985 pounds. The height of the dome above the base-line of the east front is two hundred and eighty-seven feet five inches; the height from the top of the balustrade of the building is two hundred and seventeen feet eleven inches; and the greatest diameter at the base is one hundred and thirty-five feet five inches.

The rotunda is ninety-five feet six inches in diameter, and its height from the floor to the top of the canopy is one hundred and eighty feet three inches.

The Senate Chamber is one hundred and thirteen feet three inches in length, by eighty feet three inches in width, and thirty-six feet in height. Its galleries will accommodate one thousand persons.

The Representatives' Hall is one hundred and thirty-nine feet in length, by ninety-three feet in width, and thirty-six feet in height.

The Supreme Court room was occupied by the Senate until December, 1859, the court having previously occupied the room beneath, now used as a law library.

The Library of Congress was burned by the British in 1814, and was partially destroyed by an accidental fire in 1851. The present centre hall was finished in 1853, and the wing halls were finished in 1867.
